Survey of ERAS Nurses

Angie Balfour & Imogen Fecher-Jones
Objectives

To investigate the variation in working hours, duties and remuneration for ERAS nursing roles in the UK.

To canvas opinion on what is working well and what could be improved for ERAS across the UK

Survey sent to all ERAS UK members (560/ 89 ERAS nurses) in September 2015

55 responses (9.8%) to entire survey, 33 replies from ERAS nurses (37.1%)
Background

- ERAS Nurse forums have been created nationally & internationally so we wanted to ask about the main roles and responsibilities of the various posts

- A series of questions were created by Jennifer Burch, Irene Fitt and Angie Balfour and condensed into a survey monkey questionnaire *(thanks Fiona)*

- The intention was to send out weekly surveys asking questions about specific topics e.g. Agreed protocols/ Pathways or Follow-Up routines

- Primary survey sent to all ERAS UK members (n=560) in September 2015

- Out of that membership, 89 are ERAS nurses

- 55 responses (9.8%) to entire survey,

- 33 replies from ERAS nurses (37.1%)
Results from the survey
Results: main responsibilities

- Data collection/ Audit
- Project management
- Support throughout pathway
- Reporting to board/ management
- Postoperative support
- Data review
- MDT involvement
- Patient/ relative liaison
- Stakeholder management
- Discharge support
- troubleshooting
- Pathway development
- Patient education
- Project management
- Pre-assessment
- Staff education
- Post-discharge follow up
- Risk management
- Patient safety
- Line management
- Co-ordinating investigations
- Support across specialties
Results: data collection

Do you collect data?

- Yes, using Scottish...
- Yes, using NATCANSAT
- Yes, using local database
- Yes, using regional database
- Yes, using Encare

How do you make use of data to improve patient care?

- As a research study
- For service evaluation
- Find this difficult
- Reviewed at MDT meeting
- For staff training
- Monthly newsletter
- Use patient feedback to improve care
- Pathways reviewed biannually
- Quarterly report to clinical governance
- Feedback to surgeons for their appraisals
- Ongoing review
- Feedback at patient/staff/GP events
- CCG report
- Monthly review and report to service providers
- Included in monthly Directorate management...
- Annual audit/feedback day or report
Data collection: Encare

Pre-Op ERAS compliance = 87%
Peri-Op ERAS compliance = 76%

https://www.medscinet.com/Eras
Data collection: Encare

Post–Op compliance = 31%  

https://www.medscinet.com/Eras
Results from the survey
Results: pay, hours

Current pay band

- Band 8
- Band 7
- Band 6
- Band 5
- Band 4
- Band 3

Working Hours

- Flexible: 28%
- Weekdays: 72%

Only ERAS Nurse in Trust?

- No: 52%
- Yes: 48%

How is post funded?

- Expansion of existing role
- Directorate/ Division
- Secondment
- Trust/ Substantive
- Other
- Don’t know
Discuss: terms and conditions

1. How can we reduce the variation in pay band?

2. What are the challenges of being the only ERAS nurse in a trust and how can they be overcome?

3. How can ERAS be supported at the weekend?

To be discussed later......
Different types of ERAS Nurses

Seconded project manager:
Short term post with the aim of writing and introducing new pathways to different specialities

Clinical Nurse Specialists:
Cancer nurse specialist/stoma nurse who also runs the ERAS programmes

Nurse practitioner
Specialist nurse practitioner who support the junior doctors as well as see all ERAS patients and does follow ups

Ward sister
Band 7 ward manager who is also responsible for writing and implementing pathways
Different types of ERAS Nurses

Research nurse

Employed to conduct research within an Enhanced Recovery programme. Usually seconded/ temporary position working directly with consultant surgeon.

Research fellow

Medics undergoing a period of research who are tasked with setting up an ERAS programme and evaluating the outcomes as part of their fellowship.

Other members of MDT:

e.g. Physiotherapist, Band 4 ERAS assistants
Consensus statement

The main areas of responsibility for an ERAS nurse should be data collection and audit, patient education and support throughout the pathway and training of colleagues. ERAS nurses may also undertake development of new pathways, project management, pre-assessment and post-operative support.
ERAS Nurse Role

• Literature Search
• ERAS Nurse mentioned in numerous publications
• Not much information about the Role of the ERAS Nurse
• No clear definition/Job Description for ERAS Nurses
• Usually work directly with Consultant Surgeon
• All ERAS nurses appear to be following the same series of “tasks”

But what are these “tasks” and shouldn’t we define the role more clearly?
